BENEFITS

- Particle measurements from 200 nm
- Virtually simultaneous raw gas and clean gas measurement
- Measurement and evaluation of fraction separation efficiency and burden
- Automatic data acquisition for barometer pressure, temperature, humidity, differential pressure
- Optional Temperature control (+18°C to +90°C) and moisture control (30 – 70%)
- Automatic actuation of all test rig components
- Automatic performance of the measurement processes
- Individual programming of measurement processes for filter testing using the FTControl software
- Separate measurement and analysis parts – this saves time and money, as the analysis can be performed while the measurement is still on-going
- Printouts and saving of complete test records
- Easy access to all data for the recorded measurement signals from the up to 6 external sensors
- Low-maintenance
- Easy operation
- Reliable operation
- The unit will reduce your operating costs

APPLICATIONS

- Complete filter test according to DIN 71460-1 ISO/TS 11155-1
- Test of filter media according to DIN 71460-1 ISO/TS 11155-1
- Test of other complete filters and filter media
