## **DEHS**

Di-Ethyl-Hexyl-Sebacat (DEHS) is a colorless and odorless fluid which is insoluble in water. It is very well suited for generating solid aerosols.

## **BENEFITS**

- Long service time of the aerosol (although liquid)
- · Vaporisation not until after hours
- Spheric particles (droplets)

## **APPLICATIONS**

- DEHS proven its ability for the aerosol production in particular for the acceptance and monitoring of clean room technology.
- Among the advantages of DEHS as aerosol material is the long life of the particles.
- DEHS evaporates after a long time without residue, see table.
