

The FET 300 enables the testing of filter elements up to 305 × 305 mm, such as ventilation filters, HEPA/ULPA filters, vacuum cleaner filters, and automotive cabin filters. Designed for optimal flow control, the channel can also be used for smaller filter elements with the aid of adapters. Coarse filters up to ULPA filters are tested for particle size separation and differential pressure. Thanks to individual adapters and customer-specific adjustments in the air channel, the FET system can be used for a wide variety of filter elements.

## BENEFITS

- Measurement according to ISO 29463-5 and ISO 16890 (ISO ePM<sub>1</sub>; ISO ePM<sub>2,5</sub>) in one channel
- Double channels on request
- Particularly wide range of applications for separation efficiency measurement from 0.02 to 40 µm
- Measurement of dust storage capacity possible
- Customization possible for optimal test execution
- Horizontal design to minimize particle losses
- Easy to use for filter elements as well as for material testing (adapter required)
- Protocolled results based on the relevant standards
- Test benches tested and calibrated ex works

## FEATURES

- Measurement of fractional efficiency and pressure loss vs. volume flow
- Connection of Promo<sup>®</sup> aerosol spectrometers and SMPS systems
- Customized filter adapters and adaptations in the air duct possible
- On-site calibration and adjustment (particle size and volume flow)
- Checking the volume flow and pressure loss using a perforated plate

## APPLICATIONS

- Development
- Quality control for
  - Cabin filters
  - HEPA/ULPA clean room filters
  - Cabin air filters
  - Engine air filters
  - Compressor supply air filters
- Measurement of MPPS according to ISO 29463-5
- Measurement of the fractional separation efficiency according to ISO 16890
- Determination of the pressure loss at different volume flows
- Determination of dust holding capacity

## DATASHEET

Aerosols		Dusts (e.g., SAE dusts), salts (e.g., NaCl, KCl), liquid aerosols (e.g., DEHS), latex particles (PSL)	Measuring range (total penetration)	Up to 0.0005 %
Measurement (size)	range	0.02–100 $\mu\text{m}$	Volume flow	2–200 m <sup>3</sup> /h - pressurized operation
Differential pressure measurement	pressure	0 – 1,200 Pa selectable, 0 – 2,500 Pa selectable, 0 – 5,000 Pa selectable	Size filter element	305 • 305 • 305 mm (H • W • D)

## NORMS AND CERTIFICATES

ISO 29463-5, ISO 16890, ISO 11155-1/3, DIN 71460
