

# CIF 1000

For standard tests on automotive cabin air filters according to DIN 71460-1 and ISO/TS 11155-1, Palas offers the CIF 1000 test stand with the **Promo® 1000<sup>1</sup>**.

## BENEFITS

- Particle measurements from 120 nm
- Measurement and evaluation of fraction separation efficiency and burden
- Automatic data acquisition for barometer pressure, temperature, humidity, differential pressure
- Optional temperature control (+18°C to +90°C) and moisture control (30 – 70%)
- Automatic actuation of all test rig components
- Automatic performance of the measurement processes
- Individual programming of measurement processes for filter testing using the FTControl software
- Separate measurement and analysis parts – this saves time and money, as the analysis can be performed while the measurement is still on-going
- Printouts and saving of complete test records
- Easy access to all data for the recorded measurement signals from the up to 6 external sensors
- Low-maintenance
- Easy operation
- Reliable operation
- The unit will reduce your operating costs

## APPLICATIONS

- Complete filter test according to DIN 71460-1 & ISO/TS 11155-1
- Test of filter media according to DIN 71460-1 & ISO/TS 11155-1
- Test of other complete filters and filter media
