

FIDAS® SMART 100

Fidas® Smart 100 is the most advanced compact measuring instrument for ambient air quality. It continuously and reliably analyzes airborne fine dust particles in the size range of 0.18 – 18 μm . The Fidas® Smart is approved by TÜV for PM_{2,5} and PM₁₀ for official measurements.

In addition to the fine dust fraction relevant for regulatory immission control, Fidas® Smart 100 simultaneously calculates and stores PM₁, PM₄, total dust, particle number concentration, and their particle size distribution, including pressure, temperature, humidity, CO₂.

BENEFITS

- Technology based on the certified Fidas® 200 series (EN16450 and MCERTS); simultaneous measurement of C_n, PM₁, PM_{2,5}, PM₄, PM₁₀
- High accuracy due to advanced algorithms
- Long-term stable: up to 2 years of operation without calibration possible.
- On-site calibration with test dust (NIST traceable) is possible
- Operation with AC or DC power source
- Long-life blower for sample airflow
- Regulated aerosol heating to avoid condensation

FEATURES

- Smallest and lightest EN 16450-certified device on the market
- On-site calibration and adjustment (particle size and volume flow)
- Installation and operation directly outdoors without air conditioning
- Data visualization via Palas Cloud ("MyAtmosphere-ready")
- Measurement data acquisition per second
- E-version also available with extendable sampling tube for installation in a measuring container

APPLICATIONS

- Regulatory environmental monitoring
- Construction sites
- Networks with roads, railways, and ports
- Smart City
- Occupational safety

MODEL VARIATIONS

Fidas® Smart 100 E

Fine dust measuring device for existing roof openings for measuring PM_{2,5} and PM₁₀ (EN 16450-certified) and other parameters such as PM₁, PM₄, TSP

DATASHEET

| | |
|--|--|
| Measuring principle | Optical light scattering at single particles, 90° sideways scattering |
| Reported data | PM _{2.5} , PM ₁₀ (optional PM ₁ , PM ₄ , PM _{xC} , TSP), C _N , CN, T, rH, p, CO ₂ , particle size distribution, AQI |
| Measurement range (number C _N) | 0 – 20,000 particles/cm ³ |
| Measurement range (size) | 0.178- 17.8 μ m |
| Measurement range (mass) | 0 – 20,000 μ g/m ³ |
| Measurement uncertainty | 9.0 % for PM _{2.5} , 9.7 % for PM ₁₀ (expanded measurement uncertainty according to EN 16450, TÜV Report) |
| Volume flow | 1 l/min +/-1.5% (-20 to +50°C), time-of-flight volume flow control |
| Size channels | 64 (32/decade) |
| Time resolution | 1s - 60s |
| Interfaces | USB, Ethernet (LAN), Wi-Fi, 4G (optional via LTE stick) |
| User interface | Touchscreen 800 • 480 Pixel, 5" (12,7 cm) |
| Protocols | UDP, ASCII, Modbus, Bayern/Hessen |
| Data logger storage | Approx. 6 GB data storage (2 years) |
| Data acquisition | Max. 256 raw data channels (32 size channels/decade) |
| Light source | Polychromatic LED |
| Housing | Polymer housing with weather protection and tripod/wall/pole mount option |
| Operating system | Windows 10 IoT (LTSA) |
| Power supply | 115 – 230 V, 50/60 Hz |
| Power consumption | Normal operation: 15 W, max. 60 W |
| Installation conditions | Operating temperature: -20 to +50 °C (weatherproof), operating humidity: 0 to 100% (non-condensing) |
| Sampling head | Sigma head (non-selective passive collector) |
| Dimensions | 240 • 320 • 190 mm (H • W • D) |
| Weight | 3.9 kg |
| Sampling system | Intelligent Aerosol Drying System (Compact-IADS) -Version E: extended inlet for installation in measuring containers |
| Noise emission | < 40 dB(A) |
| Resolution | 0.1 μ g/m ³ |
| Data Management | Prepared for connection to the Palas Cloud MyAtmosphere ("MyAtmosphere-ready") |

NORMS AND CERTIFICATES

ISO 21501-1, EN 15267, EN 16450
