FS₃

The Palas® flow splitter FS 3 splits an aerosol flow into three (equal) parts.

BENEFITS

- reliable and reproducible splitting of aerosol flows
- easy handling and cleaning

APPLICATIONS

- experimental setups with different measuring and sampling devices
- calibration of particle counters and particle spectrometers
- comparison of measurement systems

DATASHEET

Material	Conductive, anti-corre		e Diameter	10 mm (inlet outer diameter),
	steel			7 mm (inlet inner diameter), 8
				mm (outlet outer diameter), 6 mm (outlet inner diameter)
Dimensions	40 • 80 mm (Ø • L)		Weight	Approx. 150 g
