

# PLG 3000

The PLG 3000 is used for fractional separation efficiency measurement and loading with oil aerosols as per ISO 12500-1. The oil quantity can be adjusted using the dispensing volume flow between approx. 0.2 – 12 g/h. The PLG 3000 aerosol generator is designed to be pressure-resistant up to 7 bar positive pressure (higher pressure values upon request).

## BENEFITS

- Very exact volume flow control with use of mass flow controller

## APPLICATIONS

- Testing compressed air filters
- Measuring the fractional separation efficiency of compressed air filters
