РROMO[®] 3000 Н

The welas aerosol sensors welas 2070 P, HP, 2100 P, HP, 2300 P, HP and welas 2500 P, HP are equipped with a heatable and, as required, pressure-tight cuvette to ensure isobaric and isothermal sampling into the sensor's measurement volume. The Promo 3000 H model variant also offers heating regulation for temperatures up to 250 °C for the aerosol sensors with heatable cuvette. The Promo system is usually calibrated for the operating volume flow.

In the Promo\$ 3000 H version, the customer's regulation of the sampling volume flow is performed independently, considering the temperature and pressure.
