PROMO® LED 2000

The new light-scattering aerosol spectrometer $Promo^{\$}$ LED 2000can be equipped with different sensors for particle size analysis and concentration determination from 0.145 to 100 μm can be fitted with different sensors. The heart of the optical sensors is the new LED technology with an extra-long lifetime at the highest stability in particle sizing and counting applications.

BENEFITS

- Self-explanatory operation
- Quick and highly resolved measurement of particle size distribution
- Long lifetime on lamp due to new LED-Technology
- Large measurement range from 0.145 up to 100 μ m
- Photometer mode for measurements according to DIN EN 13274-7

FEATURES

- Long-life LED technology
- Up to four measuring ranges can be selected in one device: 0.145 μ m 10 μ m | 0.3 μ m 17 μ m | 0.6 μ m 40 μ m | 2 μ m 100 μ m
- Up to 128 size channels per measuring range
- Clear calibration curve thanks to white light source with 90° stray light detection
- Patented T-aperture: No edge zone error, coincidence detection and correction on the individual signal
- Selectable sensors for optimized measurement with regard to concentration
- On-site calibration and adjustment (particle size and volume flow)

APPLICATIONS

- Process monitoring of particle size and concentration
- Measurement of penetration of face masks
- Measurement of fractional efficiency of particle size
