The additional workshop fee includes hot and cold beverages, snacks and **lunch** at Palas®.

AIR FILTRATION SEMINAR

Panel Discussion & Networking Meeting

JOIN THE EXPERTS

We cordially invite you to the second Palas® **AIR FILTRATION SEMINAR!** We would like to offer all experts from research and industry, who are involved in the examination of filters, the opportunity, to exchange ideas and gain new, interesting insights.

You can expect exciting lectures by speakers from universities and institutes, as well as from the industry regarding the following important points:

- ISO 16890, standardization for indoor air filters
- Filter testing with regard to real conditions
- Test of pulse jet cleaned filter media
- Standardization in filter testing
- New developments of filter test systems

Our moderator, Prof. Dr. Eberhard Schmidt from the University of Wuppertal, will be pleased to guide you through the seminar program.

WORKSHOP

The additional workshop on September 25 will give you an insight in our filter test laboratory and the opportunity to discuss about the latest trends and developments.

Also, we offer all participants the opportunity to take part in measurements with the filter (media) test rigs DFP 3000, MFP 3000 G and MFP Nano Plus.

AGENDA | MORNING

- 09.00 am** **Introduction**
Prof. Schmidt, Bergische Universität Wuppertal
- 09.15 am** **Evaluation of filtration performance by using particle spectrometers in bag-house filtration - practical and theoretical experiences**
Dr. Heidenreich, ILK Dresden
- 10.00 am** **Filter media characterisation with regard to PM emissions using the ISO 11057 filter test bench**
Dr. Gäng, FilTEq
- 10.45 am** **Coffee Break**
- 11.15 am** **Towards realistic filter testing - considering real world effects**
Prof. Dittler, Karlsruhe Institut für Technologie (KIT)
- 12.00 pm** **Dilution of large droplets - requirement of the new ISO 17536 for crankcase ventilation testing**
Dipl.-Ing. (FH) Schmidt, Palas®
- 12.45 pm** **Lunch Break**

AGENDA | AFTERNOON

- 13.45 pm** **DMT A2 fine quartz-free as potential replacement of Arizona Test Dust A2 fine including comparison tests according ISO 16890-3**
Dr. Renschen, DMT
- 14.30 pm** **The testing of air filters for general ventilation according to DIN EN ISO 16890**
Dr.-Ing. Haep, IUTA
- 15.15 pm** **Coffee Break**
- 15.45 pm** **Testing high-efficiency filter media in accordance with ISO 29463-3 using poly- or monodisperse test aerosols**
Dipl.-Ing. Breidenbach, EMW
- 16.30 pm** **Filter testing in the automotive industry**
Dipl.-Ing. Conze, Mahle International
- 17.15 pm** **Open Discussion: Standardization in Filter Testing**
- 18.00 pm** **Dinner at ACHAT Restaurant**
