

PROMO[®] 2000 HP

The *welas*[®] aerosol sensors *welas*[®] 2070 HP, 2100 HP, 2300 HP and *welas*[®] 2500 HP are equipped with a cuvette heatable up to 120 °C and pressure-tight up to 10 barg to ensure isobaric and isothermal sampling into the sensor's measurement volume. The *Promo*[®] system is usually calibrated for the operating volume flow. As the operating volume flow changes with pressure and temperature, it is advantageous for the user if automatic volume flow regulation for the sampling volume flow is provided for in the device.

In the *Promo*[®] 2000 HP the pressure and temperature of the carrier gas are measured and the required operating volume flow is automatically set to 5 l/min.
