PROMO® 2000 HP

The welas® aerosol sensors welas® 2070 HP, 2100 HP, 2300 HP and welas® 2500 HP are equipped with a cuvette heatable up to 120 ℃ and pressure-tight up to 10 barg to ensure isobaric and isothermal sampling into the sensor's measurement volume. The Promo® system is usually calibrated for the operating volume flow. As the operating volume flow changes with pressure and temperature, it is advantageous for the user if automatic volume flow regulation for the sampling volume flow is provided for in the device.

In the Promo® 2000 HP the pressure and temperature of the carrier gas are measured and the required operating volume flow is automatically set to 5 l/min.
